## GENERAL CONSENT FORM

## NATIONAL VITAMIN A AND IMMUNIZATION SURVEY

Vitamin A is a substance found in some foods such as dark green leavy vegetables, yellow fruits and liver. If a child does not have enough of this vitamin he may get more severe diarrhoea and respiratory infections than he should, and in very severe cases he may even go blind. We will be checking to see if your child has enough of this vitamin. The way we check, is by examining the eyes and then taking a blood sample. Taking the blood sample
may be uncomfortable for your child, but it is harmless. This study is done by the Ministry of Health to improve the health of children in the country.
If we find that your child does not have enough vitamin A, he/she will be referred to the nearest clinic.
With the above information, as given by Dr/Mrs
I
mother/father/guardian of
residing at address

WITNESSED BY:

give consent that a blood sample may be taken from my child.
