

TABLES

LIST OF TABLES

- Table 4.1 The anthropometric status of children aged 1 – 9 years nationally and by area of residence: South Africa 1999
- Table 4.2 The anthropometric status of children aged 1 – 9 years nationally and by age groups: South Africa 1999
- Table 4.3 The anthropometric status of children aged 1 – 9 years living in the RSA by the type of dwelling and level of maternal education: South Africa 1999
- Table 4.4 The anthropometric status of children aged 1 – 3, 4 – 6 and 7 – 9 years by the level of maternal education: South Africa 1999
- Table 4.5 The anthropometric status of children aged 1 – 9 years living in urban areas by the type of dwelling and level of maternal education: South Africa 1999
- Table 4.6 The anthropometric status of children aged 1 – 9 years living in formal urban areas by the type of dwelling and level of maternal education: South Africa 1999
- Table 4.7 The anthropometric status of children aged 1 – 9 years living in informal urban areas by the type of dwelling and level of maternal education: South Africa 1999
- Table 4.8 The anthropometric status of children aged 1 – 9 years living in rural areas by the type of dwelling and level of maternal education: South Africa 1999
- Table 4.9 The anthropometric status of children aged 1 – 9 years living in tribal areas by the type of dwelling and level of maternal education: South Africa 1999
- Table 4.10 The anthropometric status of children aged 1 – 9 years living in commercial farms by the type of dwelling and level of maternal education: South Africa 1999

Table 4.11	The percentage (n =) of overweight (W/H = > + 2 SDs) children aged 1 – 9 years by the type of dwelling and level of maternal education per urban/rural and RSA: South Africa 1999
Table 4.12	The percentage (n =) of overweight (W/H = > + 2 SDs) children aged 1 – 9 years by the type of dwelling and level of maternal education per area of residence: South Africa 1999
Table 4.13	The anthropometric status of children aged 1 – 3, 4 – 6 and 7 – 9 years by the type of dwelling: South Africa 1999
Table 4.14	The anthropometric status of children aged 1 – 9 years nationally and by province: South Africa 1999
Table 4.15	The anthropometric status of children aged 1 – 3 years nationally and by province: South Africa 1999
Table 4.16	The anthropometric status of children aged 4 - 6 years nationally and by province: South Africa 1999
Table 4.17	The anthropometric status of children aged 7 – 9 years nationally and by province: South Africa 1999
Table 4.18	The anthropometric status of children aged 1 – 3 years nationally and by urban/rural: South Africa 1999
Table 4.19	The anthropometric status of children aged 4 - 6 years nationally and by urban/rural: South Africa 1999
Table 4.20	The anthropometric status of children aged 7 – 9 years nationally and by urban/rural: South Africa 1999
Table 4.21	The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: Eastern Cape, South Africa 1999
Table 4.22	The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: Free State, South Africa 1999

-
- Table 4.23 The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: Gauteng, South Africa 1999
- Table 4.24 The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: KwaZulu/Natal, South Africa 1999
- Table 4.25 The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: Mpumalanga, South Africa 1999
- Table 4.26 The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: Northern Cape, South Africa 1999
- Table 4.27 The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: Northern Province, South Africa 1999
- Table 4.28 The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: North West province, South Africa 1999
- Table 4.29 The anthropometric status of children aged 1 – 9 years by the type of dwelling and level of maternal education: Western Cape, South Africa 1999
- Table 4.30 The percentage (n =) of overweight ($W/H = > + 2$ SDs) children aged 1 – 9 years by the type of dwelling and level of maternal education per province: South Africa 1999
- Table 4.31 Comparison of the anthropometric status of children aged 12 – 71 months from the present survey and that of children obtained from the SAVACG survey (1995)
- Table 4.32 Comparison of the anthropometric status of children aged 12 – 71 months from the present survey and that of children obtained from the SAVACG survey (1995)

Table 4.33 Comparison of the anthropometric status of children in South Africa with that of children in some other countries in Africa, South America and Asia¹
